

* Use the ECS-DUPR for documenting price quotations, clarifying legal matters, confirming sales orders, reviewing transactions and specifications, documenting priority calls and more. With the ECS-DUPR you eliminate mistakes, misunderstandings, oversights, errors and inaccuracies.

* The ECS-DUPR adapts to:

- All PC computer soundcards
- All Digital recorders
- All Standard, Micro and Mini cassette recorders
- Utilizing a 3.5 mm microphone or 3.5 mm telephone record jack to give you the ability to record two-way telephone conversations

* The ECS-DUPR allows you to:

- Record cordless phone calls
- Record directly from analog wall jacks
- Record between handset and phone of all land line phones
- Record between headset and phone of all land line phones

Using your ECS-DUPR to record telephone conversations:

1. Simply insert the 3.5 mm plug end of the ECS-DUPR into the 3.5 mm jack of your microphone or telephone record jack on the device you are recording to
2. If recording from an analog wall jack see illustration below titled "Analog Wall Jack Option"
3. If recording between a handset or headset and phone base see illustration below titled "Handset/Headset Option"
4. Set your recording device to the record mode

It's that simple!
